OXYTRAVEL® worldwide, 24/7 service

The Respiratory Homecare division of Linde Gas Therapeutics, a Linde Group subsidiary, is pleased to announce the launch of OXYTRAVEL®, a groundbreaking service that brings oxygen-dependent patients the freedom to travel.

What is OXYTRAVEL®?

OXYTRAVEL® takes care of all medical oxygen needs throughout a patient's journey, freeing the patient of the worries of administering an international trip themselves*.

Underpinned by Linde's extensive international network, OXYTRAVEL® guarantees delivery of medical oxygen in dozens of countries around the world – whether the patient is travelling by train, by car, by plane or even taking a cruise.

*For domestic trips, the local Linde Gas Therapeutics provider will take care of the organization.

How does it work?

OXYTRAVEL® works in partnership with International SOS, the international medical service centre, to provide patients with around-the-clock service. Patients planning a journey simply need to call our service line. Aided by comprehensive patient files, OXYTRAVEL® does the rest – supplying the necessary equipment at the airport, station, harbour, hotel or any other location.

Three steps to a trouble-free holiday:

1. Contact OXYTRAVEL®
2. Complete the patient file
3. Enjoy your trip!
